- 💡 Revenue trend across the selected period is **upward** (+72.3% second half vs first half).
- 💡 Month-over-month movement from Jan to Jun is **+103.8%**.

CEO Recommendations

Actions suggested by current performance

- 1 Protect availability of **Sustainably Grown Organic Lg** and the wider **Coffee** range — stock-outs here cost the most revenue per hour.
- 2 Staff up for **Morning** (09:00 – 11:59) on **Mon**; queue time at peak directly caps throughput.
- 3 Run targeted promotions in the **Evening** window and on **Sat** to lift the flattest part of the trading day.
- 4 Bundle slow movers such as **Dark chocolate** with best-selling drinks to raise the **\$4.69** average order value.
- 5 Expand the **Coffee** assortment and review whether **Packaged Chocolate** deserves shelf space or a relaunch.
- 6 Replicate **Hell's Kitchen**'s playbook at the other locations and audit the weakest store's staffing and merchandising.
- 7 Launch a loyalty campaign redeemable outside peak hours to convert one-off visits into repeat purchases and smooth demand.
- 8 Momentum is upward; reinvest gains into the highest-margin categories and keep testing new seasonal items.
